Review System 2.0

My Goal is to encourage you to do reviews face to face and to eliminate having to remember multiple uuid's.

- Improve your overall speed of completing your review
- Quickly accept reviews
- Creates a file with viewer details
- Opens vs code for you
- Structure your Projects to be Reviewed

Installation guide for wtc-fire

- Open terminal
- Open your Downloads folder cd Downloads
- Copy wtc-fire bin .local/bin/ *cp wtc-fire ~/.local/bin/*
- Make it executable *sudo chmod +x ~/.local/bin/wtc-fire*
- Great your done
- Run **wtc-fire** and choose what you want to do
- **wtc-fire accept**

Basic Rules

- You don't have to include the quotation marks " " when adding a comment
- Try to accept all reviews then actually complete them
